Dr.ir. Martin Bloemendal

Assistant professor UTES / bodemenergie

- TU Delft & KWR
- MSc Civil engineering
- 15 years experience in UTES practice
- >10 years UTES research
- PhD in ATES
- Water resources department
= grondwater & oppervlakte water

Sustainable energy technology = Multi-disciplinary programme

- Multiple renewable energy sources needed to supply world energy demand
- Generation, transport, storage, and societal aspects
- **MSc SET** covers **all** these topics
- Similar programmes **TU/e** and **UT** within **4TU**.Education

Warmte opslag

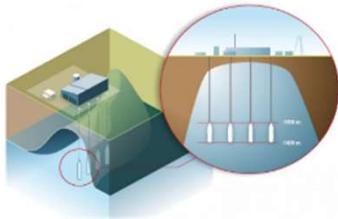

Heat demand and availability at Northern hemisphere j.m.bloemendal@tudelft.nl 17

Large scale – seasonal heat storage → Sensible heat storage

PCM & TCM
Small scale and short cycle storage

MINES/ CAVERNS

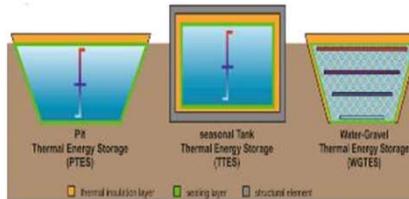

- Salt deposits in mines/caverns can be used to store energy.

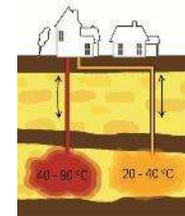

- Availability is limited
- Losses can be high

TANKS/PITS

- Offers good insulation and flexibility
- 
- Expensive & limited capacity
 - Not always possible in dense urban settings

Underground

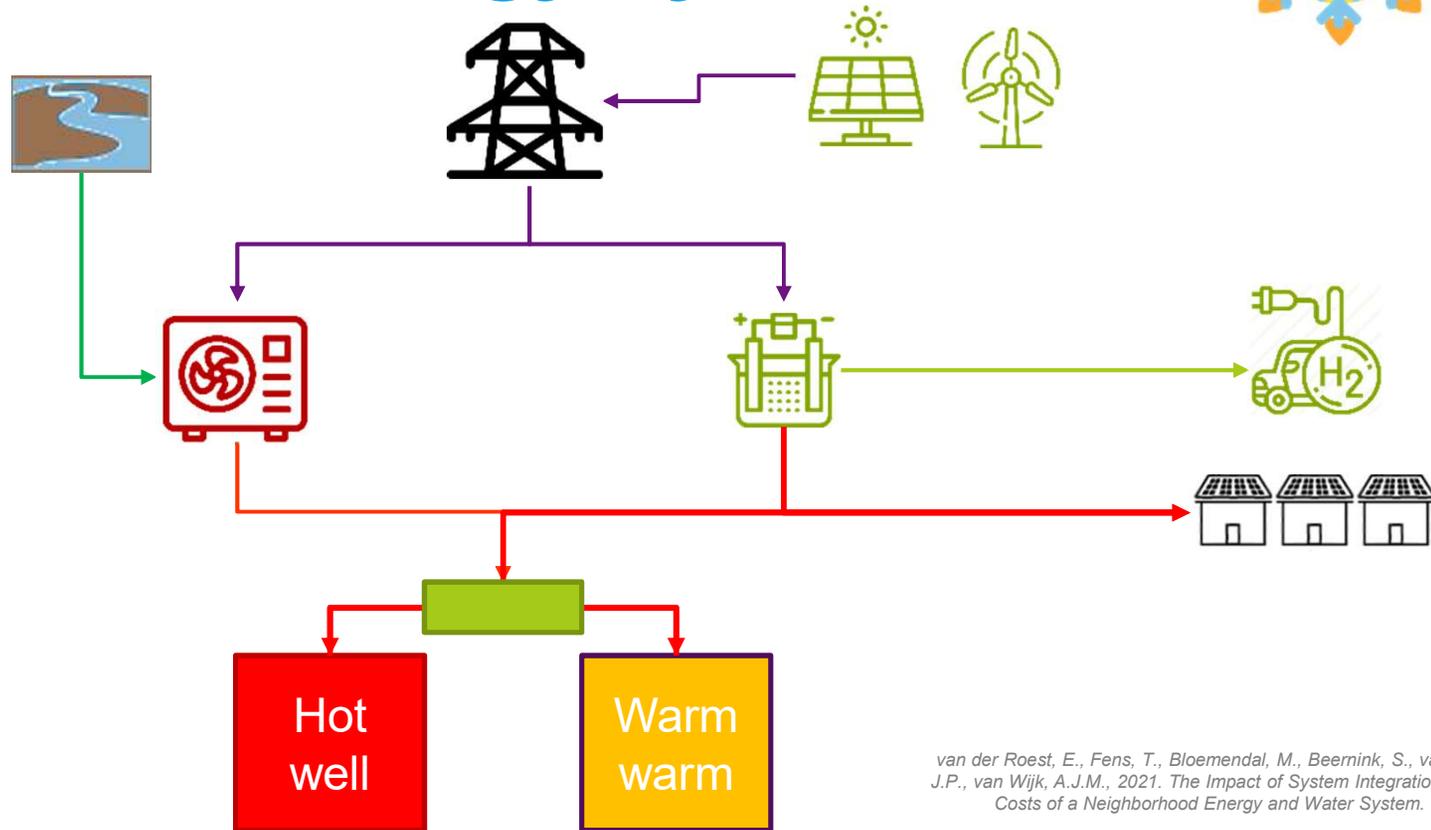

- No space requirement above ground
- Large capacities

- Subsurface infrastructure needed
- Dependent on local geological conditions

Multi energy systems

HT-ATES Delft – Lay-out/concept

- + Wells at own premises
- + In potential large demand
- + Also research and education

- Integration with Heat pump under development
- Development OWD uncertain
- Complex stakeholder landscape
